IT Product Owner - Demand and Supply Management	Hilti Asia IT Services	https://careers.hilti.group/en-us/jobs/wd-0029279-en/it-product-owner-demand-and-supply-management	<p>About the job What's the role?</p> <p>We are looking for a Product Owner in Demand and Supply Management IT team to design, implement, and support innovative and reliable digital solutions. In close collaboration with our business counterparts, other IT departments, and external partners you are leveraging our portfolio of SAP and further cloud/on-premises products to accomplish visionary business objectives in logistics for more than 50 Hilti organizations worldwide.</p> <p>You will be located in our strategic IT office in Kuala Lumpur (Malaysia) and you will be part of our international team (located in Malaysia and Switzerland).</p> <p>Who is Hilti?</p> <p>We provide leading-edge tools, technologies, software, and services for the global construction sector. Hilti is a multicultural workplace with 125 different nationalities committed to global teamwork. Global IT within Hilti is a truly global team with main hubs in Buchs (Switzerland), Kuala Lumpur (Malaysia), and Plano/Tulsa (USA). All locations have highly competent teams who work very closely together. Hilti's Global IT team is known for their focus on sustainable value creation by translating latest IT innovations into value creating solutions & services.</p> <p>What does the role involve?</p> <p>As a Product Owner in Demand and Supply Management IT team you design, implement, and run sophisticated digital solutions for Hilti's supply chain. Our solution portfolio consists of state-of-the-art cloud systems like Blue Yonder S&OP, SAP Ariba, SAP ByDesign as well as global on-premises SAP S/4HANA ERP and SAP APO systems. As an IT Product Owner, you will provide professional advice to logistics business partners, and you are responsible for</p>
---	------------------------	---	---

			<p>translating new business requirements into value adding sustainable IT solutions. In an agile approach you are collaborating with business product owners and partner with developers to elaborate convincing solution alternatives. Join us and be part of the team collaborating in a leading-edge work environment and help us continue to outperform our competition.</p> <p>Key responsibilities:</p> <ul style="list-style-type: none"> Orchestrate IT solution development by defining, prioritizing and executing backlog items together with business partners. Develop technical solutions, sustainable processes, and standards in this area Drive standardization, centralization, and contribute to digitalization initiatives Build-up sustainable support structures to operate the created solutions and processes (incl. documentation) Actively manage 3rd party vendor(s), local suppliers, and providers in your area <p>We have an excellent mix of people, which we believe makes for a more vibrant, more innovative and more productive team.</p> <p>What do we offer?</p> <p>Show us what you're made of and we'll offer you opportunities to move around the business – to work abroad, experience different job functions and tackle different markets. It's a great way to find the right match for your ambitions and achieve the exciting career you're after.</p> <p>We have a very thorough people review process, unlike any we know of in any other business. We can pair talent with opportunities - developing our people in their current roles or challenging them to work in new ways or in new places. It's how we find the right fit,</p>
--	--	--	--

			<p>further our teams personally and professionally, get the best value for each employee and increase the job satisfaction. Additionally, we offer you a wide range of benefits.</p> <p>What you need is:</p> <ul style="list-style-type: none"> Degree (or equivalent) in Information Systems, Computer Science, Business Administration with Cumulative Grade Point Average > 3.0 or similar grading 3+ years of relevant work experience in IT – ideally in Supply Chain Management (e.g. SAP APO, SAP Ariba, SAP ByDesign, Blue Yonder) or Sales solutions and Customer Relationship Management Experience with SAP ERP (e.g. ECC, R3, S4Hana, etc.) is a must-have. ABAP development is a clear plus Willingness to work closely with business counterparts and good stakeholder management & communication skills Strong interpersonal skills and team player approach with the ability to connect with global partners to bond, inspire, influence and accomplish goals Skills in managing product related topics like backlog, budget, vendors, externals and internal resources Fluent in English (verbal and written)
